PROJECT

TG MANAGEMENT SYSTEM

- Frontend Technologies: **HTML, CSS, BOOTSTRAP, JAVASCRIPT**
- Backend Technologies: **PYTHON**
- Database Technology: **MYSQL**
- About: A TG management system for educational institutes. It manages data for the management of the institutes. It has a server(for the admin). Admin is allowed to look into every student data and edit it whenever they want. It is built using templates, views and URLs in the main project.

FRONT-END CLONE WEBSITE

- Frontend Technologies: **HTML, CSS**
- About: A clone website of "chartered accountant" wrapped in some pages containing User page, Admin page. I used basic CSS properties. It is a user interactive site and a little functional (made by links).

FRONT-END SPORTS WEBSITE

- Frontend Technologies: **HTML, CSS**
- About: A clone website of "sports" wrapped in some pages containing User page, Admin page and brief history page(containing some sports cards). I used basic CSS properties. It is a user interactive site and a little functional (made by links).
